Comp Door Minimum and Maximum Sheet

This section is to provide the minimum and maximum sizes for each individual door style. The first section is to show the minimum and maximum width for our door styles. At Comp Door, we have 2 minimum widths and 1 maximum width set up. Which enables us to cut the doors down to size within the relevant parameters. The two minimum widths setup are:

- 863mm including the outer frame measurement (740mm slab width)
- 723mm including the outer frame measurement (600mm slab width)

The one maximum width is:

• 1033mm including the outer frame measurement (910mm slab width)

Minimum and Maximum Heights

The second section shows the Minimum and the Maximum Height for each individual door style. There are a few variations to the Minimum and Maximum height, and they depend on the specification of the door. For example, the threshold options will alter the minimum and maximum height as well as if a cill is needed also.

The Minimum Heights are as follows:

- Minimum Height with a Standard PVC Threshold is 1973mm no Cill. If a Cill is required, then the minimum height would be increased by 30mm to 2003mm. This is due to the upstand of the door cill being 30mm. (Minimum Slab Height is 1850mm)
- Minimum Height with an Aluminium Threshold is 1931mm no Cill. If a Cill is required, then the minimum height would be increased by 30mm to 1961mm. This is due to the upstand of the door cill being 30mm. (Minimum Slab Height is 1850mm)
- Minimum Height with a Low PVC Threshold is 1943mm no Cill. If a Cill is required, then the minimum height would be increased by 30mm to 1973mm. This is due to the upstand of the door cill being 30mm. (Minimum Slab Height is 1850mm)

The Maximum Heights are as follows:

- Maximum Height with a Standard PVC Threshold is 2183mm no Cill. If a Cill is required, then the maximum height would be increased by 30mm to 2213mm. This is due to the upstand of the door cill being 30mm. (Maximum Slab Height is 2060mm)
- Maximum Height with an Aluminium Threshold is 2141mm no Cill. If a Cill is required, then the maximum height would be increased by 30mm to 2171mm. This is due to the upstand of the door cill being 30mm. (Maximum Slab Height is 2060mm)
- Maximum Height with a Low PVC Threshold is 2153mm no Cill. If a Cill is required, then the maximum height would be increased by 30mm to 2183mm. This is due to the upstand of the door cill being 30mm. (Maximum Slab Height is 2060mm)

CompDoor Specification	Minimum Height	Maximum Height
Standard PVC Threshold- No Cill	1973mm	2183mm
Standard PVC Threshold- With a Cill	2003mm	2213mm
Aluminium Threshold- No Cill	1931mm	2141mm
Aluminium Threshold- With a Cill	1961mm	2171mm
Low PVC Threshold- No Cill	1943mm	2153mm
Low PVC Threshold- With a Cill	1973mm	2183mm
